VPN Client for teachers and researchers - Ubuntu

To use this service you need a @deec.uc.pt account!

Installation

Install OpenVPN network manager by entering (copy/paste) into the terminal

```
sudo apt-get install network-manager-openvpn-gnome
```

When the installation is complete, restart the network-manager service

```
systemctl restart NetworkManager
```

Configuration

Download the OpenVPN profile: [DEEC.ovpn](#)

Go to the Network Manager and under VPN, click the "+" button

Click "Import from file..." and select the .ovpn file I've downloaded

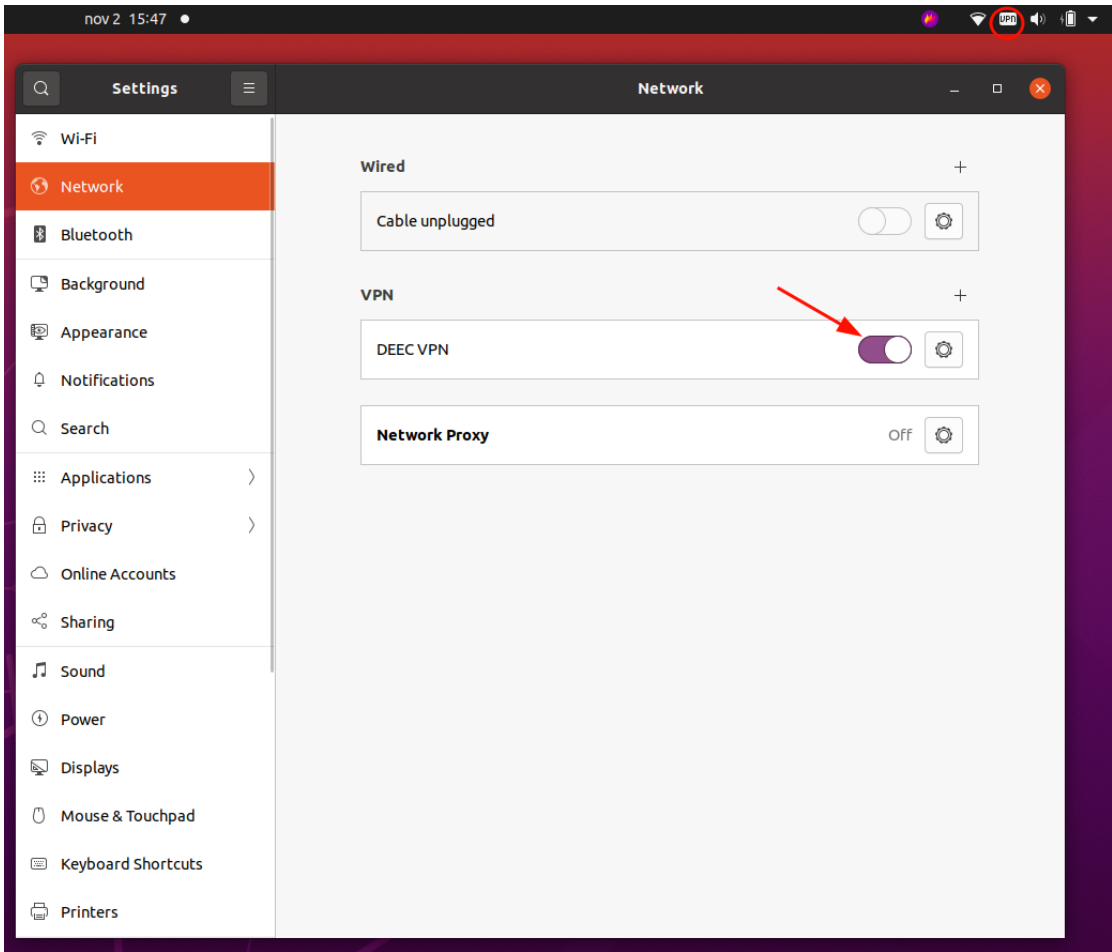

Input your credentials and click "Add"

Connection

Finally select the network manager icon, go to VPN Connections and select the created VPN.

VPN Client for teachers and researchers - Android

To use this service you need a @deec.uc.pt account!

OpenVPN Installation, Configuration and Execution Manual on Android

Configuration:

For your configuration, you must download the [DEEC.ovpn](#). Then, open the application, select the “OVPN Profile” option and accept the policies.

To add the ovpn file, just open the Files application, go to the downloaded file's directory and open it with OpenVPN.

Execution:

Finally, select “ADD” and enter the credentials and select “ADD” again. If you want, you can change the Title to an easier name to identify to the DEEC VPN.
