

Instalação de impressora Papercut no macOS OSX

Introdução

Neste documento vai ser apresentado passo a passo a instalação das impressoras da sala dos cacifos e do gabinete 3A4 no Linux e Mac OS X através do CUPS.

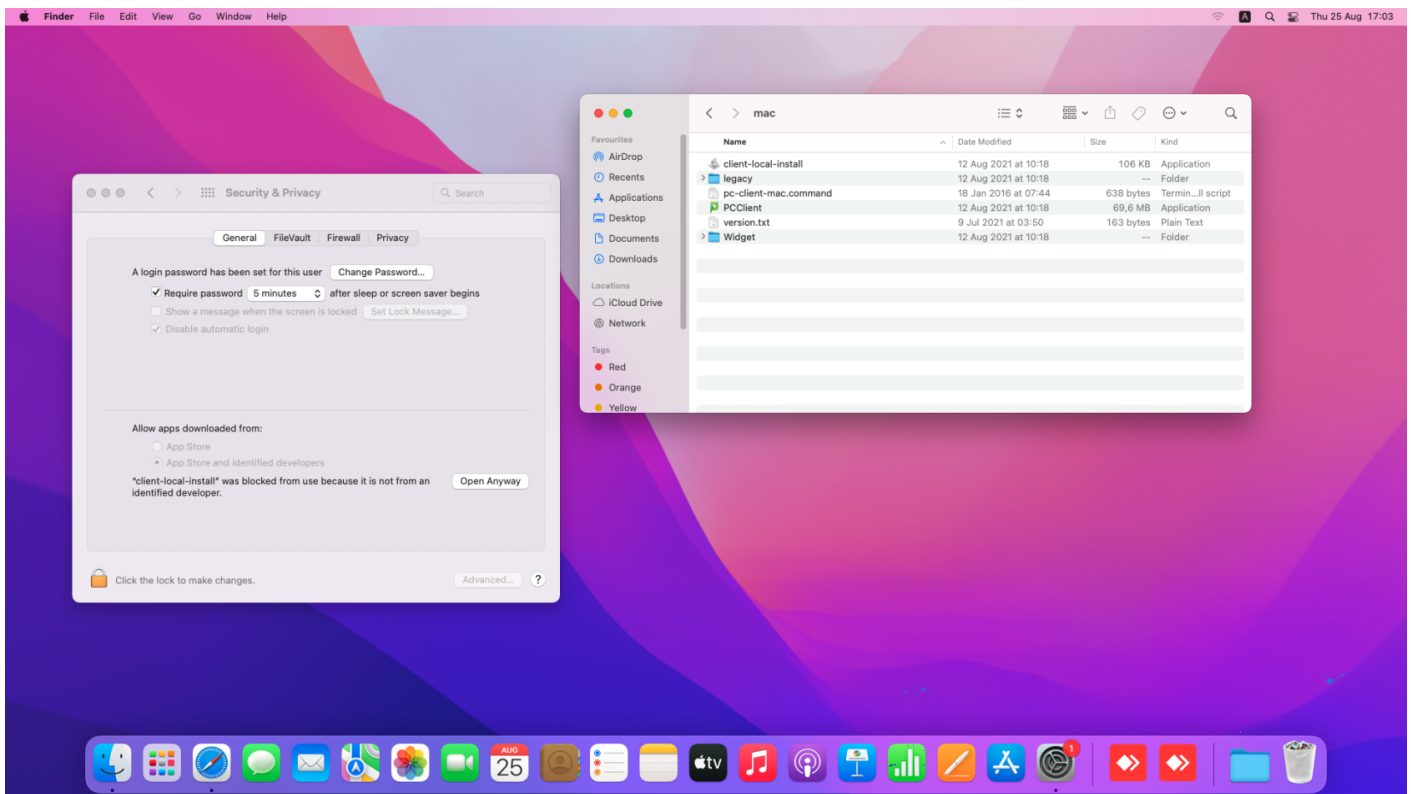

Para a instalação da impressora é necessário fazer o download dos drivers em:

<https://drive.deec.uc.pt/d/s/oMJHHXizotl32KGY2YyDqeds9hwMwFEc/Hz08uEHVqhhO2wzlXuS9ECGJ6XhpruYO-OrRAKAbQfwk>

Executar o instalador **client-local-install** localizado na pasta “drivers\client\mac” do ficheiro ZIP.

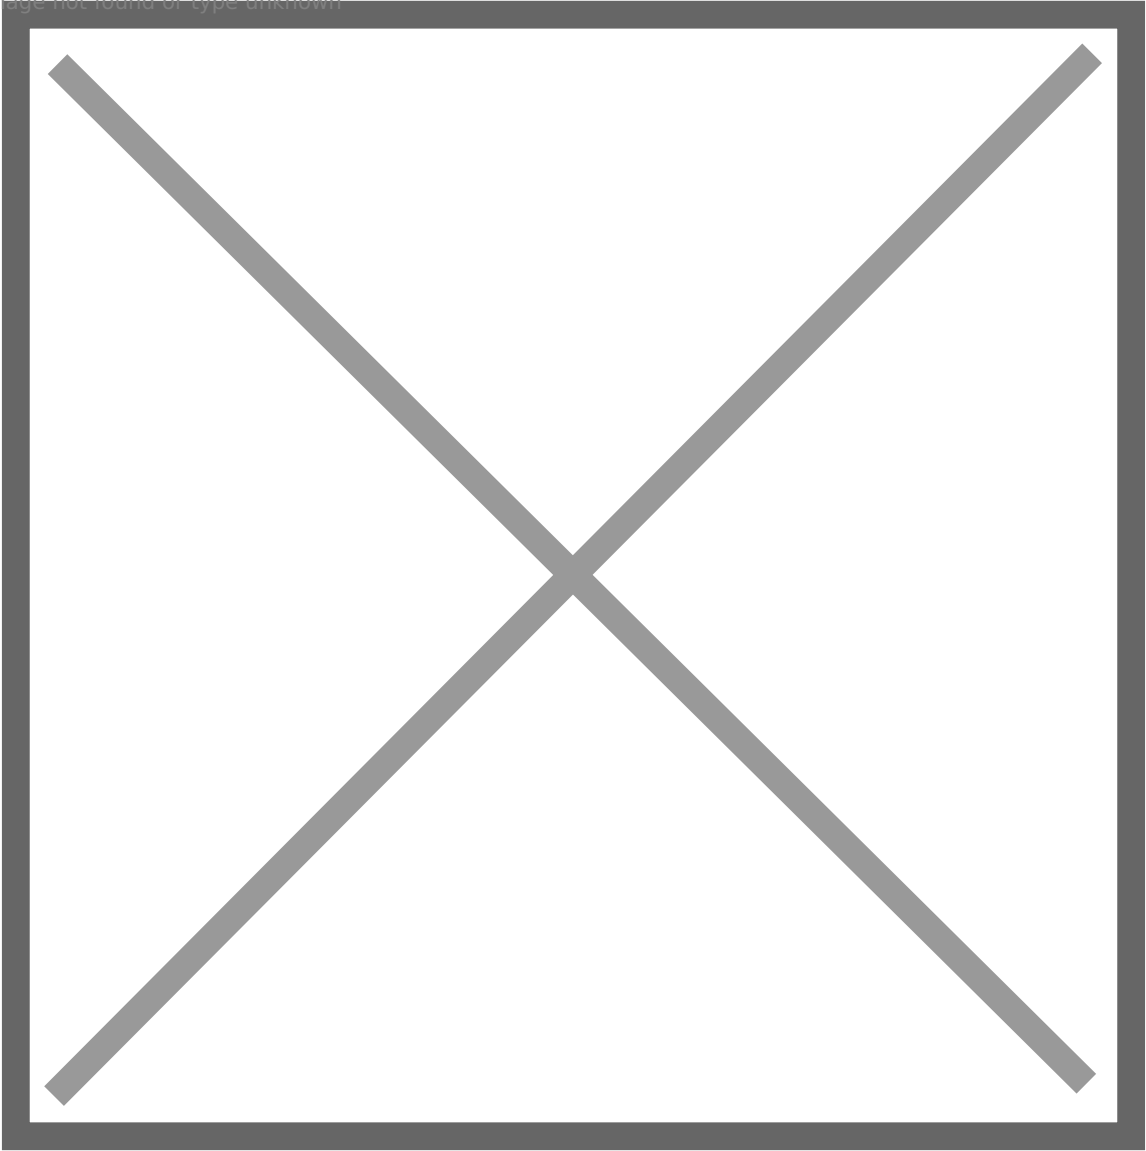

Se aparecer o erro “can’t be opened because it is from an unidentified developer.”, ir a System Preferences > Security & Privacy e em “Allow applications downloaded from:”, seleccionar “Anywhere”.

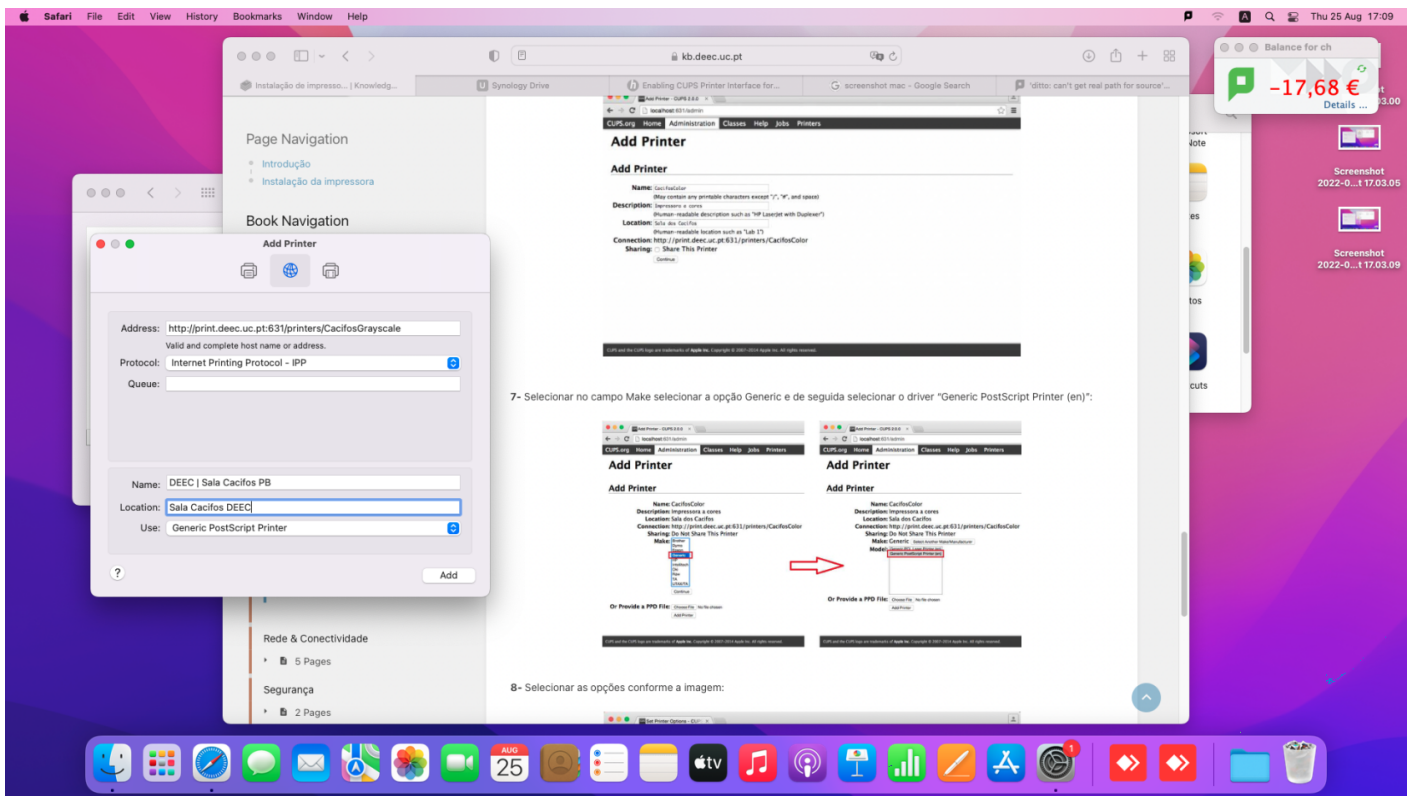

Se aparecer o erro "ditto: can't get real path for source", copie o instalador para a pasta de Aplicações e execute novamente.

Para o cliente do PaperCut arrancar automaticamente com o sistema operativo é necessário ir a System Preferences > Users & Groups e em “Login Items”, e adicionar o PCClient à lista (clicar no “+”).
