OpenVPN Manual for Ubuntu

OpenVPN Installation, Configuration and Execution Manual on Ubuntu 18.04.2 LTS

Introduction:

This document will present, step by step, the installation, configuration and execution of OpenVPN on the Ubuntu operating system.

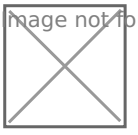
Preparation:

Before starting the installation and configuration of OpenVPN on your computer, you should check the following point:
Have an account for the configuration of OpenVPN, which is requested from the Management Office of the Computer Network.

Installation:

To use *OpenVPN* just run the following command "**$ sudo apt-get install network-manager-openvpn-gnome**".

When the installation is complete, restart the network-manager service.



Configuration:

For configuration, you must download ISR.ovpn. Use the mouse to go to the network manager icon to go to “***Edit Connections …***”, then “***Add a new connection***” and create a connection with “***Import a saved VPN configuration…***”.
