VPN installation manual on Ubuntu

OpenVPN Installation, Configuration and Execution Manual on Ubuntu 18.04.2 LTS

Introduction:

This document will present, step by step, the installation, configuration and execution of OpenVPN on the Ubuntu operating system.

Preparation:

Before starting the installation and configuration of OpenVPN on your computer, you should check the following point:
Have an account for the configuration of OpenVPN, which is requested from the Management Office of the Computer Network.

Installation:

To use *OpenVPN* just run the following command "**$ sudo apt-get install network-manager-openvpn-gnome**".

1652

When the installation is complete, restart the network-manager service.
1653

Configuration:

For your configuration, you must download IT.ovpn. Use the mouse to go to the network manager icon to go to “***Edit Connections …***”, then “***Add a new connection***” and create a connection with “***Import a saved VPN configuration…***”.

1654

1655

1656

1657

1658

Then select the IT.ovpn file and enter the IT credentials. If you want, you can change the Connection name to an easier name to identify the IT VPN.

1659

1660

Execution:

Finally select the network manager icon, go to VPN Connections and select the created VPN.
